During the transitional periods specified in Article 5, this Agreement shall not affect the implementation of the specific preferential arrangements governing the movement of goods either laid down in frontier agreements previously concluded between one or more Member States and the Socialist Federal Republic of Yugoslavia and succeeded to by Croatia or resulting from the bilateral agreements concluded by Croatia in order to promote regional trade.

3. Consultations between the Parties shall take place within the Interim Committee concerning the agreements described in paragraphs 1 and 2 of this Article and, where requested, on other major issues related to their respective trade policies towards third countries. Article 24 (SAA Article 37)

1. If one of the Parties finds that dumping is taking place in trade with the other Party within the meaning of Article VI of the GATT 1994, it may take appropriate measures against this practice in accordance with the Agreement on implementation of Article VI of the GATT 1994 and its own related internal legislation.

2. As regards paragraph 1 of this Article, the Interim Committee shall be informed of the dumping case as soon as the authorities of the importing Party have initiated an investigation. When no end has been put to the dumping within the meaning of Article VI of the GATT 1994 or no other satisfactory solution has been reached within 30 days of the matter being referred to the Interim Committee, the importing Party may adopt the appropriate measures.

Article 25 (SAA Article 38)

General safeguard clause

1. Where any product of one Party is being imported into the territory of the other Party in such increased quantities and under such conditions as to cause or threaten to cause:

- serious injury to the domestic industry of like or directly competitive products in the territory of the importing Party, or
- serious disturbances in any sector of the economy or difficulties which could bring about serious deterioration in the economic situation of a region of the importing Party,

the importing Party may take appropriate measures under the conditions and in accordance with the procedures laid down in this Article.

2. The Community and Croatia shall only apply safeguard measures between themselves in accordance with the provisions of this Agreement. Such measures shall not exceed what is necessary to remedy the difficulties which have arisen, and should normally consist of the suspension of the further reduction of any applicable rate of duty provided for under this Agreement for the product concerned or the increase of the rate of duty for that product. Such measures shall contain clear elements progressively leading to their elimination at the end of the set period at the latest. Measures shall not be taken for a period exceeding one year. In very exceptional circumstances, measures may be taken up to a total maximum period of three years. No safeguard measure shall be applied to the import of a product that has previously been subject to such a measure for a period of, at least, three years since the expiry of the measure.

3. In the cases specified in this Article, before taking the measures provided for therein or, in the cases to which paragraph 4(b) applies, as soon as possible, the Community or Croatia, as the case may be, shall supply the Interim Committee with all relevant information, with a view to seeking a solution acceptable to the two Parties.

4. For the implementation of the above paragraphs the following provisions shall apply:

- (a) the difficulties arising from the situation referred to in this Article shall be referred for examination to the Interim Committee, which may take any decisions needed to put an end to such difficulties.

If the Interim Committee or the exporting Party has not taken a decision putting an end to the difficulties or no other satisfactory solution has been reached within 30 days of the matter being referred to the Interim Committee, the importing Party may adopt the appropriate measures to remedy the problem in accordance with this Article. In the selection of safeguard measures, priority must be given to those which least disturb the functioning of the arrangements established in this Agreement;

- (b) where exceptional and critical circumstances requiring immediate action make prior information or examination, as the case may be, impossible, the Party concerned may, in the situations specified in this Article, apply forthwith precautionary measures necessary to deal with the situation and shall inform the other Party immediately thereof.

5. The safeguard measures shall be notified immediately to the Interim Committee and shall be the subject of periodic consultations within that body, particularly with a view to establishing a timetable for their abolition as soon as circumstances permit.

6. In the event of the Community or Croatia subjecting imports of products liable to give rise to the difficulties referred to in this Article to an administrative procedure having as its purpose the rapid provision of information on the trend of trade flows, it shall inform the other Party.

Article 26 (SAA Article 39)

Shortage clause

1. Where compliance with the provisions of this Title leads to:

- (a) a critical shortage, or threat thereof, of foodstuffs or other products essential to the exporting Party; or
- (b) re-export to a third country of a product against which the exporting Party maintains quantitative export restrictions, export duties or measures or charges having equivalent effect, and where the situations referred to above give rise, or are likely to give rise, to major difficulties for the exporting Party,

that Party may take appropriate measures under the conditions and in accordance with the procedures laid down in this Article.

2. In the selection of measures, priority must be given to those which least disturb the functioning of the arrangements in this Agreement. Such measures shall not be applied in a manner which would constitute a means of arbitrary or unjustifiable discrimination where the same conditions prevail, or a disguised restriction on trade and shall be eliminated when the conditions no longer justify their maintenance.

3. Before taking the measures provided for in paragraph 1 of this Article or, as soon as possible in cases to which paragraph 4 of this Article applies, the Community or Croatia, as the case may be, shall supply the Interim Committee with all relevant information, with a view to seeking a solution acceptable to the Parties. The Parties within the Interim Committee may agree on any means needed to put an end to the difficulties. If no agreement is reached within 30 days of the matter being referred to the Interim Committee, the exporting Party may apply measures under this Article on the exportation of the product concerned.

4. Where exceptional and critical circumstances requiring immediate action make prior information or examination, as the case may be, impossible, the Community or Croatia, whichever is concerned, may apply forthwith the precautionary measures necessary to deal with the situation and shall inform the other Party immediately thereof.

5. Any measures applied pursuant to this Article shall be immediately notified to the Interim Committee and shall be the subject of periodic consultations within that body, particularly with a view to establishing a timetable for their elimination as soon as circumstances permit.

Article 27 (SAA Article 40)

State monopolies

Croatia shall progressively adjust any state monopolies of a commercial character so as to ensure that, by the end of the fourth year following the entry into force of this Agreement, no discrimination regarding the conditions under which goods are procured and marketed exists between nationals of the Member States of the European Union and Croatia. The Interim Committee shall be informed about the measures adopted to attain this objective.

Article 28 (SAA Article 41)

Protocol 4 lays down the rules of origin for the application of tariff preferences provided for in this Agreement.

Such prohibitions or restrictions shall not, however, constitute a means of arbitrary discrimination or a disguised restriction on trade between the Parties.

Article 30 (SAA Article 43)

Both Parties agree to cooperate to reduce the potential for fraud in the application of the trade provisions of this Agreement.

Notwithstanding other provisions of this Agreement, and in particular Articles 18, 25 and 37 and Protocol 4, where one Party finds that there is sufficient evidence of fraud such as a significant increase in trade of products by one Party to the other Party, beyond the level reflecting economic conditions such as normal production and export capacities, or failure to provide administrative cooperation as required for the verification of evidence of origin by the other Party, both Parties shall enter into consultations immediately to find an appropriate solution. Pending such solution, the Party concerned may take the appropriate measures it deems necessary. In the selection of the measures, priority must be given to those which least disturb the functioning of the arrangements established in this Agreement.

Article 31 (SAA Article 44)

The application of this Agreement shall be without prejudice to the application of the provisions of Community law to the Canary Islands.

1. The Parties shall endeavour wherever possible to avoid the imposition of restrictive measures, including measures relating to imports, for balance of payments purposes. A Party adopting such measures shall present as soon as possible to the other Party a timetable for their removal.

2. Where one or more Member States of the European Union or Croatia is in serious balance of payments difficulties, or under imminent threat thereof, the Community or Croatia, as the case may be, may, in accordance with the conditions established under the WTO Agreement, adopt restrictive measures, including measures relating to imports, which shall be of limited duration and may not go beyond what is strictly necessary to remedy the balance of payments situation. The Community or Croatia, as the case may be, shall inform the other Party forthwith.

3. Any restrictive measures shall not apply to transfers related to investment and in particular to the repatriation of amounts invested or reinvested or any kind of revenues stemming therefrom.

Upon request by one Party, the other Party shall provide information on particular individual cases of public aid.

6. Croatia shall establish a comprehensive inventory of aid schemes instituted before the establishment of the authority referred to in paragraph 4 and shall align such aid schemes with the criteria referred to in paragraph 2 of this Article within a period of no more than four years from the entry into force of this Agreement.

7. (a) For the purposes of applying the provisions of paragraph 1(iii), the Parties recognise that during the first four years after the entry into force of this Agreement, any public aid granted by Croatia shall be assessed taking into account the fact that Croatia shall be regarded as an area identical to those areas of the Community described in Article 87(3)(a) of the Treaty establishing the European Community.

— paragraph 1(iii) shall not apply,

— any practices contrary to paragraph 1(i) shall be assessed according to the criteria established by the Community on the basis of Articles 36 and 37 of the Treaty establishing the European Community and specific Community instruments adopted on this basis.

9. If one of the Parties considers that a particular practice is incompatible with the terms of paragraph 1 of this Article, it may take appropriate measures after consultation within the Interim Committee or after 30 working days following referral for such consultation.

Nothing in this Article shall prejudice or affect in any way the taking, by either Party, of anti-dumping or countervailing measures in accordance with the relevant Articles of GATT 1994 and WTO Agreement on Subsidies and Countervailing Measures or related internal legislation.

Article 36 (SAA Article 71)

Intellectual, industrial and commercial property

3. The Interim Committee may decide to oblige Croatia to accede to specific multilateral Conventions in this area.

Article 1

This Protocol shall apply to the products listed in Chapter 72 of the Common Customs Tariff. It shall also apply to other finished steel products that may originate in future in Croatia under the above chapter.

Article 2

Customs duties on imports applicable in the Community on steel products originating in Croatia shall be abolished on the date of entry into force of the Agreement.

Article 3

1. Customs duties applicable in Croatia on imports of steel products originating in the Community other than those listed in Annex I shall be abolished at the entry into force of the Agreement.

2. Customs duties applicable in Croatia on imports of steel products listed in Annex I shall be progressively abolished in accordance with the following timetable:

- on the date of entry into force of the Agreement, duty shall be reduced to 65 % of the basic duty,
- on 1 January 2003, duty shall be reduced to 50 % of the basic duty,
- on 1 January 2004, duty shall be reduced to 35 % of the basic duty,
- on 1 January 2005, duty shall be reduced to 20 % of the basic duty,
- on 1 January 2006, the remaining duties shall be abolished.

Article 4

1. Quantitative restrictions on imports into the Community of steel products originating in Croatia as well as measures having equivalent effect shall be abolished on the date of entry into force of the Agreement.

2. Quantitative restrictions on imports into Croatia of steel products originating in the Community, as well as measures having equivalent effect, shall be abolished on the date of entry into force of the Agreement.

Article 5

1. In view of the disciplines stipulated by Article 35 of the Agreement, the Parties recognise the need and urgency that each Party addresses promptly any structural weaknesses of its

steel sector to ensure the global competitiveness of its industry. Croatia shall therefore establish within two years the necessary restructuring and conversion programme for its steel industry to achieve viability of this sector under normal market conditions. Upon request, the Community shall provide Croatia with the appropriate technical advice to achieve this objective.

2. Further to the disciplines stipulated by Article 35 of the Agreement, any practices contrary to this Article shall be assessed on the basis of specific criteria arising from the application of the state aid disciplines of the Community, including secondary legislation, and including any specific rules on state aid control applicable to the steel sector after the expiry of the ECSC Treaty.

3. For the purposes of applying the provisions of paragraph 1(iii) of Article 35 of the Agreement with regard to steel products, the Community recognises that during five years after the entry into force of the Agreement Croatia may exceptionally grant state aid for restructuring purposes provided that:

- it leads to the viability of the benefiting firms under normal market conditions at the end of the restructuring period, and
- the amount and intensity of such aid are strictly limited to what is absolutely necessary in order to restore such viability and are progressively reduced, and
- the restructuring programme is linked to a global rationalisation and reduction of capacity in Croatia.

4. Each Party shall ensure full transparency with respect to the implementation of the necessary restructuring and conversion programme by a full and continuous exchange of information to the other Party, including details on the restructuring plan as well as amount, intensity and purpose for any state aid granted on the basis of paragraphs 2 and 3 of this article.

5. The Interim Committee shall monitor the implementation of the requirements set out in paragraphs 1 to 4 above.

6. If one of the Parties considers that a particular practice of the other Party is incompatible with the terms of this article, and if that practice causes or threatens to cause prejudice to the interests of the first Party or material injury to its domestic industry, this Party may take appropriate measures after consultation within the contact group referred to in Article 7 or after 30 working days following referral for such consultation.

Article 6

The provisions of Articles 6, 7 and 8 of the Agreement shall apply to trade between the Parties in steel products.

Article 7

The Parties agree that for the purpose of following and reviewing the proper implementation of this Protocol, a contact group shall be created in accordance with Article 41 of the Agreement.

- (b) products obtained in the Community incorporating materials which have not been wholly obtained there, provided that such materials have undergone sufficient working or processing in the Community within the meaning of Article 6 of this Protocol.

- (a) products wholly obtained in Croatia within the meaning of Article 5 of this Protocol;
- (b) products obtained in Croatia incorporating materials which have not been wholly obtained there, provided that such materials have undergone sufficient working or processing in Croatia within the meaning of Article 6 of this Protocol.

Article 3

Bilateral cumulation in the Community

Materials originating in Croatia shall be considered as materials originating in the Community when incorporated into a product obtained there. It shall not be necessary that such materials have undergone sufficient working or processing, provided they have undergone working or processing going beyond the operations referred to in Article 7(1).

*Article 4***Bilateral cumulation in Croatia**

Materials originating in the Community shall be considered as materials originating in Croatia when incorporated into a product obtained there. It shall not be necessary that such materials have undergone sufficient working or processing, provided they have undergone working or processing going beyond the operations referred to in Article 7(1).

*Article 5***Wholly obtained products**

1. The following shall be considered as wholly obtained in the Community or in Croatia:

- (a) mineral products extracted from their soil or from their seabed;

*Article 6***Sufficiently worked or processed products**

1. For the purposes of Article 2, products which are not wholly obtained are considered to be sufficiently worked or processed when the conditions set out in the list in Annex II are fulfilled.

The conditions referred to above indicate, for all products covered by this Agreement, the working or processing which must be carried out on non-originating materials used in manufacturing and apply only in relation to such materials. Accordingly, it follows that if a product, which has acquired originating status by fulfilling the conditions set out in the list, is used in the manufacture of another product, the conditions applicable to the product in which it is incorporated do not apply to it, and no account shall be taken of the non-originating materials which may have been used in its manufacture.

2. Notwithstanding paragraph 1, non-originating materials which, according to the conditions set out in the list, should not be used in the manufacture of a product may nevertheless be used, provided that:

- (a) their total value does not exceed 10 % of the ex-works price of the product;

- (b) any of the percentages given in the list for the maximum value of non-originating materials are not exceeded through the application of this paragraph.

This paragraph shall not apply to products falling within Chapters 50 to 63 of the Harmonised System.

3. Paragraphs 1 and 2 shall apply except as provided in Article 7.

Article 7

Insufficient working or processing operations

1. Without prejudice to paragraph 2, the following operations shall be considered as insufficient working or processing to confer the status of originating products, whether or not the requirements of Article 6 are satisfied:

1. The unit of qualification for the application of the provisions of this Protocol shall be the particular product which is considered as the basic unit when determining classification using the nomenclature of the Harmonised System.

Accordingly, it follows that:

- (a) when a product composed of a group or assembly of articles is classified under the terms of the Harmonised System in a single heading, the whole constitutes the unit of qualification;
- (b) when a consignment consists of a number of identical products classified under the same heading of the Harmonised System, each product must be taken individually when applying the provisions of this Protocol.

2. Where, under General Rule 5 of the Harmonised System, packaging is included with the product for classification purposes, it shall be included for the purposes of determining origin.

Article 9

Accessories, spare parts and tools

Accessories, spare parts and tools dispatched with a piece of equipment, machine, apparatus or vehicle, which are part of the normal equipment and included in the price thereof or which are not separately invoiced, shall be regarded as one with the piece of equipment, machine, apparatus or vehicle in question.

Article 10

Sets

Sets, as defined in General Rule 3 of the Harmonised System, shall be regarded as originating when all component products are originating. Nevertheless, when a set is composed of originating and non-originating products, the set as a whole shall be regarded as originating, provided that the value of the non-originating products does not exceed 15 % of the ex-works price of the set.

*Article 11***Neutral elements**

- (b) they have not undergone any operation beyond that necessary to preserve them in good condition while in that country or while being exported.

3. The acquisition of originating status in accordance with the conditions set out in Title II shall not be affected by working or processing done outside the Community or Croatia on materials exported from the Community or Croatia and subsequently reimported there, provided:

- (a) the said materials are wholly obtained in the Community or Croatia or have undergone working or processing beyond the insufficient operations listed in Article 7 prior to being exported; and

- (ii) the total added value acquired outside the Community or Croatia by applying the provisions of this Article does not exceed 10 % of the ex-works price of the end product for which originating status is claimed.

4. For the purposes of paragraph 3, the conditions for acquiring originating status set out in Title II shall not apply to working or processing done outside the Community or Croatia. But where, in the list in Annex II, a rule setting a maximum value for all the non-originating materials incorporated is applied in determining the originating status of the end product, the total value of the non-originating materials incorporated in the territory of the party concerned, taken together with the total added value acquired outside the Community or Croatia by applying the provisions of this Article, shall not exceed the stated percentage.

5. For the purposes of applying the provisions of paragraphs 3 and 4, 'total added value' shall be taken to mean all costs arising outside the Community or Croatia, including the value of the materials incorporated there.

2. The prohibition in paragraph 1 shall apply to any arrangement for refund, remission or non-payment, partial or complete, of customs duties or charges having an equivalent effect, applicable in the Community or in Croatia to materials used in the manufacture, where such refund, remission or non-payment applies, expressly or in effect, when products obtained from the said materials are exported and not when they are retained for home use there.

3. In other cases of belated presentation, the customs authorities of the importing country may accept the proofs of origin where the products have been submitted before the said final date.

Article 24

Submission of proof of origin

Proofs of origin shall be submitted to the customs authorities of the importing country in accordance with the procedures applicable in that country. The said authorities may require a translation of a proof of origin and may also require the import declaration to be accompanied by a statement from the importer to the effect that the products meet the conditions required for the implementation of the Agreement.

Article 25

Importation by instalments

Where, at the request of the importer and on the conditions laid down by the customs authorities of the importing country, dismantled or non-assembled products within the meaning of General Rule 2(a) of the Harmonised System falling within Sections XVI and XVII or heading Nos 7308 and 9406 of the Harmonised System are imported by instalments, a single proof of origin for such products shall be submitted to the customs authorities upon importation of the first instalment.

In the case of products sent by post, this declaration can be made on the customs declaration CN22/CN23 or on a sheet of paper annexed to that document.

2. Imports which are occasional and consist solely of products for the personal use of the recipients or travellers or their families shall not be considered as imports by way of trade if it is evident from the nature and quantity of the products that no commercial purpose is in view.

3. Furthermore, the total value of these products shall not exceed EUR 500 in the case of small packages or EUR 1 200 in the case of products forming part of travellers' personal luggage.

Article 27

Discrepancies and formal errors

1. The discovery of slight discrepancies between the statements made in the proof of origin and those made in the documents submitted to the customs office for the purpose of carrying out the formalities for importing the products shall not *ipso facto* render the proof of origin null and void if it is duly established that this document does correspond to the products submitted.

2. Obvious formal errors such as typing errors on a proof of origin should not cause this document to be rejected if these errors are not such as to create doubts concerning the correctness of the statements made in this document.

Article 30

Amounts expressed in euro

1. For the application of the provisions of Article 21(1)(b) and Article 26(3) in cases where products are invoiced in a currency other than euro, amounts in the national currencies of the Member States or Croatia equivalent to the amounts expressed in euro shall be fixed annually by each of the countries concerned.

The Commission of the European Communities shall notify Croatia of the relevant amounts.

4. Croatia may round up or down the amount resulting from the conversion into its national currency of an amount expressed in euro. The rounded-off amount may not differ from the amount resulting from the conversion by more than 5 %. Croatia may retain unchanged its national currency equivalent of an amount expressed in euro if, at the time of the annual adjustment provided for in paragraph 3, the conversion of that amount, prior to any rounding-off, results in an increase of less than 15 % in the national currency equivalent. The national currency equivalent may be retained unchanged if the conversion would result in a decrease in that equivalent value.

5. The amounts expressed in euro shall be reviewed by the Interim Committee at the request of the Community or Croatia. When carrying out this review, the Interim Committee shall consider the desirability of preserving the effects of the limits concerned in real terms. For this purpose, it may decide to modify the amounts expressed in euro.

TITLE VI

ARRANGEMENTS FOR ADMINISTRATIVE COOPERATION

Article 31

Mutual assistance

1. The customs authorities of the Member States and of Croatia shall provide each other, through the Commission of the European Communities, with specimen impressions of stamps used in their customs offices for the issue of movement certificates EUR.1 and with the addresses of the customs authorities responsible for verifying those certificates and invoice declarations.

2. In order to ensure the proper application of this Protocol, the Community and Croatia shall assist each other, through the competent customs administrations, in checking the authenticity of the movement certificates EUR.1 or the invoice declarations and the correctness of the information given in these documents.

Article 32

Verification of proofs of origin

1. Subsequent verifications of proofs of origin shall be carried out at random or whenever the customs authorities of the importing country have reasonable doubts as to the authenticity of such documents, the originating status of the products concerned or the fulfilment of the other requirements of this Protocol.

2. For the purposes of implementing the provisions of paragraph 1, the customs authorities of the importing country shall return the movement certificate EUR.1 and the invoice, if it has been submitted, the invoice declaration, or a copy of these documents, to the customs authorities of the exporting country giving, where appropriate, the reasons for the enquiry. Any documents and information obtained suggesting that the information given on the proof or origin is incorrect shall be forwarded in support of the request for verification.

3. The verification shall be carried out by the customs authorities of the exporting country. For this purpose, they shall have the right to call for any evidence and to carry out any inspection of the exporter's accounts or any other check considered appropriate.

4. If the customs authorities of the importing country decide to suspend the granting of preferential treatment to the products concerned while awaiting the results of the verification, release of the products shall be offered to the importer subject to any precautionary measures judged necessary.

5. The customs authorities requesting the verification shall be informed of the results of this verification as soon as possible. These results must indicate clearly whether the documents are authentic and whether the products concerned can be considered as products originating in the Community or in Croatia and fulfil the other requirements of this Protocol. Where the cumulation provisions in accordance with Articles 3 and 4 of this Protocol were applied and in connection with Article 17(3), the reply shall include a copy (copies) of the movement certificate(s) or invoice declaration(s) relied upon.

6. If in cases of reasonable doubt there is no reply within 10 months of the date of the verification request or if the reply does not contain sufficient information to determine the authenticity of the document in question or the real origin of the products, the requesting customs authorities shall, except in exceptional circumstances, refuse entitlement to the preferences.

Article 33

Dispute settlement

Where disputes arise in relation to the verification procedures of Article 32 which cannot be settled between the customs authorities requesting a verification and the customs authorities responsible for carrying out this verification or where they raise a question as to the interpretation of this Protocol, they shall be submitted to the Interim Committee.

In all cases the settlement of disputes between the importer and the customs authorities of the importing country shall be under the legislation of the said country.

Article 34

Penalties

Penalties shall be imposed on any person who draws up, or causes to be drawn up, a document which contains incorrect information for the purpose of obtaining a preferential treatment for products.

Article 35

Free zones

1. The Community and Croatia shall take all necessary steps to ensure that products traded under cover of a proof of origin which in the course of transport use a free zone situated in their territory are not substituted by other goods and do not undergo handling other than normal operations designed to prevent their deterioration.

2. By means of an exemption to the provisions contained in paragraph 1, when products originating in the Community or in Croatia are imported into a free zone under cover of a proof of origin and undergo treatment or processing, the authorities concerned shall issue a new EUR.1 certificate at the exporter's request, if the treatment or processing undergone is in conformity with the provisions of this Protocol.

TITLE VII

CEUTA AND MELILLA

Article 36

Application of the Protocol

1. The term 'Community' used in Article 2 does not cover Ceuta and Melilla.

2. Products originating in Croatia, when imported into Ceuta or Melilla, shall enjoy in all respects the same customs regime as that which is applied to products originating in the customs territory of the Community under Protocol 2 of the Act of Accession of the Kingdom of Spain and the Portuguese Republic to the European Communities. Croatia shall grant to imports of products covered by the Agreement and originating in Ceuta and Melilla the same customs regime as that which is granted to products imported from and originating in the Community.

3. For the purpose of the application of paragraph 2 concerning products originating in Ceuta and Melilla, this Protocol shall apply *mutatis mutandis* subject to the special conditions set out in Article 37.

Article 37

Special conditions

1. Providing they have been transported directly in accordance with the provisions of Article 13, the following shall be considered as:

(1) products originating in Ceuta and Melilla:

- (a) products wholly obtained in Ceuta and Melilla;
- (b) products obtained in Ceuta and Melilla in the manufacture of which products other than those referred to in (a) are used, provided that:
 - (i) the said products have undergone sufficient working or processing within the meaning of Article 6 of this Protocol; or that
 - (ii) those products are originating in Croatia or the Community within the meaning of this Protocol, provided that they have been submitted to working or processing which goes beyond the insufficient working or processing referred to in Article 7(1).

(2) products originating in Croatia:

- (a) products wholly obtained in Croatia;
- (b) products obtained in Croatia, in the manufacture of which products other than those referred to in (a) are used, provided that:
 - (i) the said products have undergone sufficient working or processing within the meaning of Article 6 of this Protocol; or that
 - (ii) those products are originating in Ceuta and Melilla or the Community within the meaning of this Protocol, provided that they have been submitted to working or processing which goes beyond the insufficient working or processing referred to in Article 7(1).

2. Ceuta and Melilla shall be considered as a single territory.

3. The exporter or his authorised representative shall enter 'Croatia' and 'Ceuta and Melilla' in box 2 of movement certificates EUR.1 or on invoice declarations. In addition, in the case of products originating in Ceuta and Melilla, this shall be indicated in box 4 of movement certificates EUR.1 or on invoice declarations.

TITLE VIII

FINAL PROVISIONS

Article 38

Amendments to the Protocol

4. The Spanish customs authorities shall be responsible for the application of this Protocol in Ceuta and Melilla.

The Interim Committee may decide to amend the provisions of this Protocol.

ANNEX I

INTRODUCTORY NOTES TO THE LIST IN ANNEX II

Note 1

The list sets out the conditions required for all products to be considered as sufficiently worked or processed within the meaning of Article 6.

Note 2

- 2.1. The first two columns in the list describe the product obtained. The first column gives the heading number or chapter number used in the Harmonised System and the second column gives the description of goods used in that system for that heading or chapter. For each entry in the first two columns a rule is specified in column 3 or 4. Where, in some cases, the entry in the first column is preceded by an 'ex', this signifies that the rules in column 3 or 4 apply only to the part of that heading as described in column 2.
- 2.2. Where several heading numbers are grouped together in column 1 or a chapter number is given and the description of products in column 2 is therefore given in general terms, the adjacent rules in column 3 or 4 apply to all products which, under the Harmonised System, are classified in headings of the chapter or in any of the headings grouped together in column 1.
- 2.3. Where there are different rules in the list applying to different products within a heading, each indent contains the description of that part of the heading covered by the adjacent rules in column 3 or 4.
- 2.4. Where, for an entry in the first two columns, a rule is specified in both columns 3 and 4, the exporter may opt, as an alternative, to apply either the rule set out in column 3 or that set out in column 4. If no origin rule is given in column 4, the rule set out in column 3 has to be applied.

Note 3

- 3.1. The provisions of Article 6, concerning products having acquired originating status which are used in the manufacture of other products, shall apply, regardless of whether this status has been acquired inside the factory where these products are used or in another factory in Croatia or in the Community.

Example:

An engine of heading No 8407, for which the rule states that the value of the non-originating materials which may be incorporated may not exceed 40 % of the ex-works price, is made from 'other alloy steel roughly shaped by forging' of heading No ex 7224.

If this forging has been forged in Croatia from a non-originating ingot, it has already acquired originating status by virtue of the rule for heading No ex 7224 in the list. The forging can then count as originating in the value-calculation for the engine, regardless of whether it was produced in the same factory or in another factory in Croatia. The value of the non-originating ingot is thus not taken into account when adding up the value of the non-originating materials used.

- 3.2. The rule in the list represents the minimum amount of working or processing required, and the carrying-out of more working or processing also confers originating status; conversely, the carrying-out of less working or processing cannot confer originating status. Thus, if a rule provides that non-originating material, at a certain level of manufacture, may be used, the use of such material at an earlier stage of manufacture is allowed, and the use of such material at a later stage is not.

- 3.3. Without prejudice to Note 3.2, where a rule states that 'materials of any heading' may be used, materials of the same heading as the product may also be used, subject, however, to any specific limitations which may also be contained in the rule. However, the expression 'manufacture from materials of any heading, including other materials of heading No ...' means that only materials classified in the same heading as the product and of a different description than that of the product as given in column 2 of the list may be used.
- 3.4. When a rule in the list specifies that a product may be manufactured from more than one material, this means that one or more materials may be used. It does not require that all be used.

Example:

The rule for fabrics of headings Nos 5208 to 5212 provides that natural fibres may be used and that chemical materials, among other materials, may also be used. This does not mean that both have to be used; it is possible to use one or the other, or both.

- 3.5. Where a rule in the list specifies that a product must be manufactured from a particular material, the condition obviously does not prevent the use of other materials which, because of their inherent nature, cannot satisfy the rule. (See also Note 6.2 below in relation to textiles).

Example:

The rule for prepared foods of heading No 1904, which specifically excludes the use of cereals and their derivatives, does not prevent the use of mineral salts, chemicals and other additives which are not products from cereals.

However, this does not apply to products which, although they cannot be manufactured from the particular materials specified in the list, can be produced from a material of the same nature at an earlier stage of manufacture.

Example:

In the case of an article of apparel of ex Chapter 62 made from non-woven materials, if the use of only non-originating yarn is allowed for this class of article, it is not possible to start from non-woven cloth — even if non-woven cloths cannot normally be made from yarn. In such cases, the starting material would normally be at the stage before yarn — that is, the fibre stage.

- 3.6. Where, in a rule in the list, two percentages are given for the maximum value of non-originating materials that can be used, then these percentages may not be added together. In other words, the maximum value of all the non-originating materials used may never exceed the higher of the percentages given. Furthermore, the individual percentages must not be exceeded, in relation to the particular materials to which they apply.

Note 4

- 4.1. The term 'natural fibres' is used in the list to refer to fibres other than artificial or synthetic fibres. It is restricted to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres which have been carded, combed or otherwise processed, but not spun.
- 4.2. The term 'natural fibres' includes horsehair of heading No 0503, silk of headings Nos 5002 and 5003, as well as wool-fibres and fine or coarse animal hair of headings Nos 5101 to 5105, cotton fibres of headings Nos 5201 to 5203, and other vegetable fibres of headings Nos 5301 to 5305.

- 4.3. The terms 'textile pulp', 'chemical materials' and 'paper-making materials' are used in the list to describe the materials, not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.
- 4.4. The term 'man-made staple fibres' is used in the list to refer to synthetic or artificial filament tow, staple fibres or waste, of headings Nos 5501 to 5507.

Note 5

- 5.1. Where, for a given product in the list, reference is made to this Note, the conditions set out in column 3 shall not be applied to any basic textile materials used in the manufacture of this product and which, taken together, represent 10 % or less of the total weight of all the basic textile materials used. (See also Notes 5.3 and 5.4 below).
- 5.2. However, the tolerance mentioned in Note 5.1 may be applied only to mixed products which have been made from two or more basic textile materials.

The following are the basic textile materials:

- silk,
- wool,
- coarse animal hair,
- fine animal hair,
- horsehair,
- cotton,
- paper-making materials and paper,
- flax,
- true hemp,
- jute and other textile bast fibres,
- sisal and other textile fibres of the genus *Agave*,
- coconut, abaca, ramie and other vegetable textile fibres,
- synthetic man-made filaments,
- artificial man-made filaments,
- current-conducting filaments,
- synthetic man-made staple fibres of polypropylene,
- synthetic man-made staple fibres of polyester,
- synthetic man-made staple fibres of polyamide,
- synthetic man-made staple fibres of polyacrylonitrile,
- synthetic man-made staple fibres of polyimide,
- synthetic man-made staple fibres of polytetrafluoroethylene,
- synthetic man-made staple fibres of polyphenylene sulphide,
- synthetic man-made staple fibres of polyvinyl chloride,
- other synthetic man-made staple fibres,
- artificial man-made staple fibres of viscose,
- other artificial man-made staple fibres,

- yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped,
- yarn made of polyurethane segmented with flexible segments of polyester, whether or not gimped,
- products of heading No 5605 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film,
- other products of heading No 5605.

Example:

A yarn, of heading No 5205, made from cotton fibres of heading No 5203 and synthetic staple fibres of heading No 5506, is a mixed yarn. Therefore, non-originating synthetic staple fibres which do not satisfy the origin-rules (which require manufacture from chemical materials or textile pulp) may be used up to a weight of 10 % of the yarn.

Example:

A woollen fabric, of heading No 5112, made from woollen yarn of heading No 5107 and synthetic yarn of staple fibres of heading No 5509, is a mixed fabric. Therefore, synthetic yarn which does not satisfy the origin-rules (which require manufacture from chemical materials or textile pulp), or woollen yarn which does not satisfy the origin-rules (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning), or a combination of the two, may be used provided their total weight does not exceed 10 % of the weight of the fabric.

Example:

Tufted textile fabric, of heading No 5802, made from cotton yarn of heading No 5205 and cotton fabric of heading No 5210, is only a mixed product if the cotton fabric is itself a mixed fabric made from yarns classified in two separate headings, or if the cotton yarns used are themselves mixtures.

Example:

If the tufted textile fabric concerned had been made from cotton yarn of heading No 5205 and synthetic fabric of heading No 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is, accordingly, a mixed product.

- 5.3. In the case of products incorporating 'yarn made of polyurethane segmented with flexible segments of polyether, whether or not gimped', this tolerance is 20 % in respect of this yarn.
- 5.4. In the case of products incorporating 'strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding 5 mm, sandwiched by means of an adhesive between two layers of plastic film', this tolerance is 30 % in respect of this strip.

Note 6

- 6.1. Where, in the list, reference is made to this Note, textile materials (with the exception of linings and interlinings), which do not satisfy the rule set out in the list in column 3 for the made-up product concerned, may be used, provided that they are classified in a heading other than that of the product and that their value does not exceed 8 % of the ex-works price of the product.
- 6.2. Without prejudice to Note 6.3, materials, which are not classified within Chapters 50 to 63, may be used freely in the manufacture of textile products, whether or not they contain textiles.

Example:

If a rule in the list provides that, for a particular textile item (such as trousers), yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified within Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners, even though slide-fasteners normally contain textiles.

- 6.3. Where a percentage-rule applies, the value of materials which are not classified within Chapters 50 to 63 must be taken into account when calculating the value of the non-originating materials incorporated.

Note 7

- 7.1. For the purposes of headings Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, the 'specific processes' are the following:

- (a) vacuum-distillation;
- (b) redistillation by a very thorough fractionation-process ⁽¹⁾;
- (c) cracking;
- (d) reforming;
- (e) extraction by means of selective solvents;
- (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally-active earth, activated earth, activated charcoal or bauxite;
- (g) polymerisation;
- (h) alkylation;
- (i) isomerisation.

- 7.2. For the purposes of headings Nos 2710, 2711 and 2712, the 'specific processes' are the following:

- (a) vacuum-distillation;
- (b) redistillation by a very thorough fractionation-process ⁽¹⁾;
- (c) cracking;
- (d) reforming;
- (e) extraction by means of selective solvents;
- (f) the process comprising all of the following operations: processing with concentrated sulphuric acid, oleum or sulphuric anhydride; neutralisation with alkaline agents; decolourisation and purification with naturally-active earth, activated earth, activated charcoal or bauxite;
- (g) polymerisation;
- (h) alkylation;
- (ij) isomerisation;
- (k) in respect of heavy oils of heading No ex 2710 only, desulphurisation with hydrogen, resulting in a reduction of at least 85 % of the sulphur-content of the products processed (ASTM D 1266-59 T method);
- (l) in respect of products of heading No 2710 only, deparaffining by a process other than filtering;

⁽¹⁾ See Additional Explanatory Note 4(b) to Chapter 27 of the Combined Nomenclature.

- (m) in respect of heavy oils of heading No ex 2710 only, treatment with hydrogen, at a pressure of more than 20 bar and a temperature of more than 250 °C, with the use of a catalyst, other than to effect desulphurization, when the hydrogen constitutes an active element in a chemical reaction. The further treatment, with hydrogen, of lubricating oils of heading No ex 2710 (e.g. hydrofinishing or decolourisation), in order, more especially, to improve colour or stability shall not, however, be deemed to be a specific process;
 - (n) in respect of fuel oils of heading No ex 2710 only, atmospheric distillation, on condition that less than 30 % of these products distils, by volume, including losses, at 300 °C, by the ASTM D 86 method;
 - (o) in respect of heavy oils other than gas oils and fuel oils of heading No ex 2710 only, treatment by means of a high-frequency electrical brush-discharge.
- 7.3. For the purposes of headings Nos ex 2707, 2713 to 2715, ex 2901, ex 2902 and ex 3403, simple operations, such as cleaning, decanting, desalting, water-separation, filtering, colouring, marking, obtaining a sulphur-content as a result of mixing products with different sulphur-contents, or any combination of these operations or like operations, do not confer origin.

4. If a request does not meet the formal requirements set out above, its correction or completion may be requested; in the meantime precautionary measures may be ordered.

*Article 7***Execution of requests**

1. In order to comply with a request for assistance, the requested authority shall proceed, within the limits of its competence and available resources, as though it were acting on its own account or at the request of other authorities of that same Contracting Party, by supplying information already possessed, by carrying out appropriate enquiries or by arranging for them to be carried out. This provision shall also apply to any other authority to which the request has been addressed by the requested authority when the latter cannot act on its own.

2. Requests for assistance shall be executed in accordance with the legal or regulatory provisions of the requested Contracting Party.

3. Duly authorised officials of a Contracting Party may, with the agreement of the other Contracting Party involved and subject to the conditions laid down by the latter, be present to obtain in the offices of the requested authority or any other concerned authority in accordance with paragraph 1 information relating to activities that are or may be operations in breach of customs legislation which the applicant authority needs for the purposes of this Protocol.

*Article 9***Exceptions to the obligation to provide assistance**

1. Assistance may be refused or may be subject to the satisfaction of certain conditions or requirements in cases where a Party is of the opinion that assistance under this Protocol would:

 - (b) be likely to prejudice public policy, security or other essential interests, in particular in the cases referred to under Article 10(2); or
 - (c) violate an industrial, commercial or professional secret.

3. Where the applicant authority seeks assistance which it would itself be unable to provide if so requested, it shall draw attention to that fact in its request. It shall then be for the requested authority to decide how to respond to such a request.
4. For the cases referred to in paragraphs 1 and 2, the decision of the requested authority and the reasons therefor must be communicated to the applicant authority without delay.

*Article 10***Information exchange and confidentiality**

1. Any information communicated in whatsoever form pursuant to this Protocol shall be of a confidential or restricted nature, depending on the rules applicable in each of the Contracting Parties. 2. To that end, contracting parties shall communicate to each other information on their applicable rules, including, where appropriate, legal provisions in force in the Member States of the Community.
3. The use, in judicial or administrative proceedings instituted in respect of operations in breach of customs legislation, of information obtained under this Protocol, is considered to be for the purposes of this Protocol. Therefore, the Contracting Parties may, in their records of evidence, reports and testimonies and in proceedings and charges brought before the courts, use as evidence information obtained and documents consulted in accordance with the provisions of this Protocol. The competent authority which supplied that information or gave access to those documents shall be notified of such use.
4. Information obtained shall be used solely for the purposes of this Protocol. Where one of the Contracting Parties wishes to use such information for other purposes, it shall obtain the prior written consent of the authority which provided the information. Such use shall then be subject to any restrictions laid down by that authority.

*Article 11***Experts and witnesses**

An official of a requested authority may be authorised to appear, within the limitations of the authorisation granted, as an expert or witness in judicial or administrative proceedings regarding the matters covered by this Protocol, and produce such objects, documents or certified copies thereof, as may be needed for the proceedings. Notwithstanding the provisions of paragraph 1, the provisions of this Protocol shall take precedence over the provisions of any bilateral agreement on mutual assistance which has been or may be concluded between individual Member States and Croatia in so far as the provisions of the latter are incompatible with those of this Protocol.

3. In respect of questions relating to the applicability of this Protocol, the Contracting Parties shall consult each other to resolve the matter in the framework of the Interim Committee set up under Article 38 of this Agreement.
